

Compact B

Belt grinding machine for skis and snowboards

The space saving design of the Compact B makes it the ideal manual belt grinding machine for ski and snowboard shops working with limited space and budget. Its two belt speeds deliver reliable performance for everything from base grinding to precise tuning and final polishing. For shops looking to maximize space even further, the optional fully integrated side edge grinding unit can potentially eliminate the need for a separate standalone edger—freeing up valuable floor space. Built in wheels add mobility, making the Compact B easy to position wherever it's needed.

Benefits:

- Compact and robust design, with minimal space requirements
- Optional side edge grinding unit, fully integrated
- Easy to operate
- Built in wheels make it mobile
- Mobile on wheels
